katilasulabh@gmail.com github.com/sulabhkatila sulabhkatila.github.io linkedin.com/in/sulabhkatila
(646) 548-8328 New York, NY

EDUCATION

St. Joseph's University

B.S. in Mathematics & Computer Science, Minor in Data Science

May 2026

Valedictorian | GPA: 3.95/4.00

TECHNICAL SKILLS

Languages: C, C#, Python, Java, JavaScript, TypeScript, Bash, SQL, HTML

Frameworks: .NET (dotnet), Playwright, Selenium, Django, React, Express, Next.js

Tools: Unix/Linux, Git, Docker, Kubernetes, Google Cloud Platform (GCP), NodeJS, MySQL, MongoDB, NoSQL

EXPERIENCE

TransPerfect

New York, NY

QA Automation Engineering Intern

February 2025 – May 2026

- Developed and maintained automated test framework using C# and .NET to support UI and API tests creation across projects
- Developed automated test suites for complex web application workflows, increasing test coverage and improving release stability
- Designed and developed a custom parser tool to automatically update 400+ test cases, saving 80+ manual engineering hours
- Refactored legacy automated test suites plagued by flaky failures, cutting the false-positive rate by 65%, reducing CI/CD pipeline execution time by up to 22 minutes per run, and lowering overall infrastructure resource usage
- Built NLP evaluation pipelines to benchmark 5 large language models across 9 task categories, surfacing performance gaps that informed the production model selection decision

St. Joseph's University

New York, NY

Tutor

September 2023 – May 2026

- Communicated and tutored complex technical concepts to students in Programming in Java, Data Structures and Algorithms, Scripting Languages, Calculus, and Statistics, achieving up to an 80% improvement in test scores
- Developed personalized learning plans for students based on individual assessments to target specific knowledge gaps

Undergraduate Research Fellow

June 2024 – August 2024

- Collected 70,000+ rows of NYC real estate data and processed it through cleaning, normalization, and feature engineering
- Built regression and neural network models in Scikit-learn and TensorFlow, and critically interpreted supporting visualizations, to identify and articulate the forces driving NYC real estate price and demand shifts across all 5 boroughs
- Presented the independent research findings to academic audience at Saint Joseph's University undergraduate research symposium

HealthStream

Remote, USA

QA Engineering Intern

September 2024 – December 2024

- Designed and built a Python/Selenium automated testing framework from scratch for a large-scale web application that had no existing automation, providing the team a scalable foundation to write and maintain tests going forward
- Performed manual QA across 20 feature tickets per sprint, filing up to 15 bug reports per sprint that surfaced critical defects before production and contributed to a cleaner release pipeline

Boys Hope Girls Hope of New York

New York, USA

Mathematics Tutor

February 2024 – May 2024

- Tutored 10 high school students from underserved backgrounds in math through one-on-one and small group sessions

PROJECTS

Email Read Receipts Generator:

- Developed a Chrome extension to track emails and generate read receipts, featuring an intuitive, user-friendly interface
- Built an HTTPS server and SMTPS client from scratch in C, utilizing multi-threading and multi-processing to reduce latency by ~30%, ensuring seamless handling of concurrent requests and enhanced performance

Multi-Player Coding Challenge Platform:

- Developed back-end and front-end components of a full-stack web application using the MERN stack, leveraging WebSockets to enable real-time, multi-player coding challenges with a focus on direct, one-on-one competition

Programming Language Interpreter:

- Engineered a performant Lox programming language interpreter in Rust, averaging 65% of Python 3.12.4's execution speed

HONORS & AWARDS

- [Winner, HackNYU 2025](#)
- [Hon. Mention, CalHacks 12.0](#)
- 8 x Dean's List, SJNY
- Kappa Gamma Pi
- Delta Epsilon Sigma
- Esse Non Videri Scholarship, SJNY
